

Dear Friends,

This past year we celebrated 25 years of providing free, excellent quality medical care. I've had the pleasure of meeting a good number of adults who came through our clinics when they were kids. Many work in the communities they grew up in—I've met community organizers, quite a few teachers, and a surprising number who have gone into medicine. One person, who runs a farmer's market now, told me he was inspired to learn how food affects health while on the Asthma Van. Just recently another person, now a nurse, told me that she makes it a point to listen with focus during appointments because she felt respected and listened to when MCC staff would patiently listen during her appointments.

Throughout our history, including this past year, our providers worked hard to coach people on their journey to health. I know that our clinics are seen as inspiring and transformative, not because I can look at a data point, but because people will go out of their way to tell me so. I speak for all of us at Mobile Care that we want our current patients to, 25 years from now, talk about our mobile clinics as enthusiastically, and with as much wonder, as the adults who talk about them today.

Our goals over the next three years are to double our dental clinic capacity, add new therapies for food allergy and asthma treatment, expand our asthma clinic to serve adults, and to use what we have learned to help our partners operate mobile units that are a sustainable part of the fabric of their communities. What we celebrate is a model of care that is responsible for its outcomes on an individual level; that defines success by individuals who are kept healthy over time. We show that it is possible for the care we need to be delivered to us in our neighborhoods by people we know, with mutual accountability. It's with great pride that, thanks to the incredible support of many people, I can reflect on the over 20,000 children who have had that experience of medical and dental care over the past 25 years.

With gratitude from our patients and staff,

A handwritten signature in black ink, appearing to read 'Matt Siemer', with a stylized, flowing script.

Matt Siemer
Executive Director

Our Mission

Mobile Care Chicago's mission is to deliver no-cost medical and preventative care, education, and support to low-income children and families in their communities aboard mobile medical clinics.

“I’m so grateful for the Mobile Care Chicago Dental Van team. They provided 80 students with exams in just one day, and even caught a couple of serious infections that might have gone unnoticed. It’s such a relief knowing our kids are getting the care they need.”

- Lake County School Nurse

Asthma Vans

The Asthma Vans provide specialized medical care to children with asthma and allergies by traveling directly to neighborhoods in need, primarily serving patients at their schools. Through targeted outreach, the program identifies high-need sites in underserved areas with elevated rates of pediatric asthma, morbidity, and mortality. Regular follow-up visits ensure that asthma, allergies, and eczema remain well-managed for all patients.

“My daughter’s PCP said her breathing issues were normal. When we found Mobile Care through her school, she finally got the medicine she needed, now she’s breathing so much better, and I’m so grateful.”

– Mother of Asthma
Van Patient

Dental Vans

This year, the Dental Van provided comprehensive care across 217 unique partner sites, including schools and Head Start programs. The mobile clinic has the same features and services as a brick-and-mortar dental practice in higher income communities.

NEW IN 2025

MCC Honored with 2025 White Sox Diamond Impact Award

This year, Mobile Care Chicago was selected as a recipient of the 2025 White Sox Diamond Impact Award! The one-time award of \$125,000 supports innovative initiatives that benefit Chicago communities. Mobile Care Chicago will use these funds to kick-off a much-needed expansion of the Dental Van program through the purchase of a second mobile unit, enabling the Dental Van team to reach more patients than ever before.

NEW IN 2025

MCC Officially Launches Mobile Community Health Incubator

Mobile Care Chicago launched a new Mobile Community Health Incubator in October 2024. One important component is a communal garage space where partner organizations can house their mobile clinics. The Incubator is designed to support organizations by providing:

- ★ Access to the MCC Flex Van
- ★ Storage space for partner mobile units and their supplies
- ★ Collaboration with healthcare professionals, community organizers, and public health advocates
- ★ Essential tools and tips for operating mobile clinics
- ★ Connections with maintenance experts

Read more about our current partners on pages 15-20 of this report!

NEW IN 2025

Welcoming a New Chapter for MCC's Parent Advisory Board

Mobile Care Chicago is expanding the number of people served with intentionality and community input. This year, MCC re-established a Parent Advisory Board with members from both the Asthma and Dental programs to increase communication between MCC and patient families, increase MCC's presence in various communities and schools, as well as receive feedback on current services.

NEW IN 2025

Asthma Clinics Continue to Provide Care for Young Adult Patients

Twenty five years ago, the Asthma Vans were launched to provide care exclusively to children through partnerships with local schools. Many patients who started in elementary school didn't want to leave when they graduated from school. As one long-standing patient recently explained:

"I'm comfortable with you guys, I love coming here. You take good care of me and I don't want to leave."

Last year MCC embarked on a multi-year extension into adult care, hosting adult clinics one day per week, ensuring some of our favorite patients don't need to have their care disrupted.

Introducing the Mobile Community Health Incubator

Mobile Care Chicago's ultimate goal with its Mobile Community Health Incubator is to empower organizations across Chicagoland (and beyond) to provide high-quality mobile healthcare and community-based programs. No specialty practice is designed to meet the human body's every need, and no non-profit is capable of ending poverty alone - doing our part in fostering a coalition of like-minded organizations expands our collective impact!

Incubator Partners

Our current Mobile Community Health Incubator partners include:

Roger's Park Free Store

**Partner
Spotlight:**
2020 Perfect
Vision Clinic

“I truly believe we go further when we come together as a community. Sharing resources—like what worked and what didn’t—makes us more effective, more efficient, and ultimately allows us to reach more people. Organizations like Mobile Care Chicago were instrumental in helping us grow ETM into what it is today.”

— Dinai Yelverton, Founder,
ETM Foundation

Experiences That Matter Foundation (ETM) founded their 2020 Perfect Vision clinic on a bold idea: that every child deserves access to clear eyesight, regardless of income or zip code. What began as a spark of inspiration in 2019 grew into a mission to eliminate the barriers that keep Black and Brown children from receiving quality vision care.

Through our Mobile Community Health Incubator, Mobile Care Chicago supported ETM in their early planning stages and leased one of our vans to help them pilot their first programs. Earlier this year, ETM launched Chicago's first and only free mobile vision clinic: a fully equipped, child-friendly unit designed to bring screenings, exams, and even same-day glasses directly to the communities that need it most.

Their clinic is staffed by licensed optometrists and ophthalmologists, many of them volunteers through partnerships with Northwestern University and Lurie Children's Hospital, and offers top-tier care in a space designed to put kids at ease. ETM now houses their mobile clinic in our garage and continues to expand their reach across the city.

From concept to clinic, MCC is honored to have played a small part in bringing ETM's 2020 Perfect Vision initiative into focus.

“Mobile Care Chicago’s Incubator Program has been instrumental in the launch of Chi-Care’s street medicine program, providing critical mentorship, infrastructure support, and strategic guidance in a simplified manner. We’re incredibly thankful to the MCC team for their dedication to helping bring our vision into reality, allowing us to bring medical care directly to Chicago’s most vulnerable communities.”

— Arham Khan, Board member, Chi-Care

Chi-Care was founded in March 2020 to meet the urgent needs of Chicago's unhoused population during the early days of the COVID-19 pandemic. Their mission is simple but deeply compassionate: provide warm meals, clean water, and survival supplies directly to homeless encampments throughout the city, restoring not only physical well-being, but a sense of dignity often lost in the struggle for survival.

Since their founding, Chi-Care has worked alongside local restaurants and community partners to deliver thousands of hot meals and basic necessities. As their impact grew, so did their vision. This summer, with support from MCC's Mobile Community Health Incubator, Chi-Care launched their newest initiative: Chi-Care Med, a mobile medical program designed to bring health services directly to unhoused individuals where they are. Our team consulted with Chi-Care on the design and logistics of mobile health delivery, drawing on our two decades of experience providing mobile medical care. We're proud to house the Chi-Care Med vehicle in our garage space and continue to serve as a partner as they expand their reach.

Chi-Care Med represents a powerful next step in their mission: to not only feed Chicago's unhoused residents, but to care for their health with the same consistency, respect, and immediacy.
